HIGHLIGHTS OF THE EVENT

- Pharmaceutical Seminars
- Medical Technology Seminars
- International Healthcare Conference
- Dental Technology Seminars

FACTS OF BANGLADESH'S MEDICAL INDUSTRY

OVERVIEW:

Currently the 57th largest economy in the world, Bangladesh has been making significant socio-economic developments in recent years. Yet, despite improving healthcare indicators such as decline in mortality rates and increase in average life expectancy, the health sector of the country is yet to reach its full potential. Though Bangladesh is one of the ten countries with lowest health expenditure. However, reform policies coupled with innovation and investment by the private sector may translate into rapid rise of this sector. In 2003, the direct contribution of the sector to GDP was \$1.78 billion, increasing to 3.45 billion in 2017. With an annual two-digit growth rate, the Bangladesh pharmaceutical industry is now heading towards export after meeting local demand. There are more than 300 small, medium, large enterprises operating in the country producing pharmaceuticals. The Government of Bangladesh encourages foreign companies to partner with local companies in producing drugs, and high-tech and specialized products. Regulations have eased, allowing foreign companies to export medical products to Bangladesh. Bangladesh offers opportunities for exporters of high-end medical equipment, surgical instruments, diagnostic equipment, and services. Imported medicines and medical devices are subject to customs duties depending on types and classes. Anti-cancer drugs, vaccines, hormonal contraceptives, and others can be imported without any tax. The majority of high quality medical institutions are centered in the capital city of Dhaka and it acts as the hub for medical service dissemination across the country.

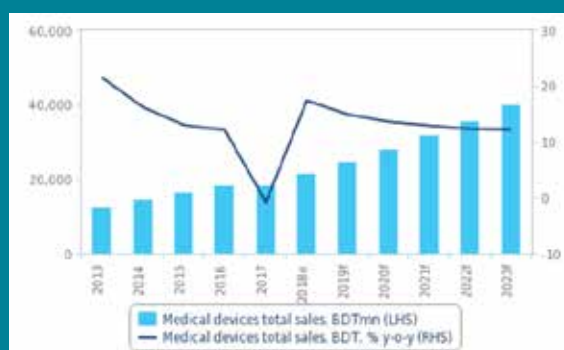

BANGLADESH MEDICAL EQUIPMENT INDUSTRY

The medical device market is projected to grow by a 2018-2023 CAGR of 13.2% in local currency terms, above the previously projected 2018-2023 CAGR of 12.4%, which will take the value to BDT40.3bn (USD426.3mn) by 2023. The market will benefit from robust economic expansion, although this will be constrained by a slowdown in western economies which remain Bangladesh's main export markets and leading source of foreign direct investment.

Market drivers include rising health expenditure, the need to develop healthcare infrastructure, Asian Development Bank funding approved in October 2018 for primary care, and assistance from international aid agencies.

Market barriers include the uneven distribution of healthcare facilities, poor access to health services in rural areas, one of the world's lowest physician/nurse to population ratios, low per capita spending on medical devices, inflation of medical device prices by local suppliers, and limited domestic production, mainly focused on basic consumables.

Exports will grow in 2019 as a modest domestic industry begins to form. Exports decreased by 14.7% y-o-y to USD3.7mn in the three months to November 2018. Over the 12-month period to November 2018, they rose by 15.4% to USD16.3mn.

EXHIBITOR PROFILE

Medical Technology

- Medical equipment, Diagnostic equipment
- Therapeutic equipment, Life support equipment
- Medical monitoring,
- Alternative medicine Biomedicine
- Health care / Preventive health care
- Rescue and emergency equipment, medical
- Radiobiology, Brain science
- Pathology / forensic medicine
- Physiotherapy / orthopaedic technology
- Equipment and devices for dentistry branches
- Equipment and devices for veterinary medicine
- Packaging / aseptic packaging
- Neurosurgery / spine surgery

Hospitals / Health Centres / Clinics Equipment and Products

- Medical consumables / medical disposables
- Furniture, assemblies and fabrics
- Communication and information technology
- Facility management, Waste management
- Hospital and clinical utilities
- Surgical instruments / suction equipment
- Surgical room equipment, Air purifier
- Surgical / OT lights

Laboratory and Analytical Equipment and Products

- Laboratory technology and equipment Laboratory equipment
- Thermal equipment Mechanical equipment Isolating technology Reaction equipment
- Dosing systems, Accessories
- Gas technology, Safety technology
- Pumps, conveyors and connectors
- Cleaning equipment, Drying equipment
- Supplies and consumables, Vendor products
- Laboratory services, miscellaneous

Analytical Equipment

- Bio analysis, Bio chemical
- Microscopes and imaging
- Analytica instrumentation and systems
- Instruments for physical and chemical analysis

Life sciences, Biotechnology and Diagnostics

- Bio analysis, Biochemical, Bioinformatics
- Equipment for biotechnology
- Diagnostics kits

Measuring and Testing

- Testing and measuring instruments
- Quality control services
- Material testing Temperature tracking

Pharmacy and Dispensary Equipment and Furniture

- Pharmaceutical products
- Equipment for chemists shops, dispensaries and pharmacies
- Facilities for chemists shops, dispensaries and pharmacies

Rehabilitation

- Daily living aids, Household and nutrition
- Physical care and hygiene, Mobility, Communication
- Building and living, Safety and monitoring systems
- Pedagogy, education and further training
- Workplace and occupation
- Physical training, physio- and ergotherapy
- Orthopaedic aids, Nursing and medical care
- Clothing, protective equipment
- Leisure, sports and recreation, Travel Associations, institutions, organisations
- Aids for children

Components

- Production / manufacturing, Materials / substance
- Micro- / nanotechnology, Testing
- Components for medical technology
- Furniture / castor wheels
- Fixtures, Fittings, Medical lighting, Software

Service Provider

- Consulting services, TQM, Education / training
- Specialists literature
- Institutes / academies / associations / services

Hospital Infrastructure

- HVAC and medical gas, OT and clean room partitions
- Building materials and drywalls
- Flooring, ceiling, roofing, doors
- Construction and engineering
- Patient safety and nurse call systems, Special paints
- Catering equipment and services
- Architecture, planners and consultants
- Lighting / electrical fittings
- Emergency medical care and transportation
- Building automation systems
- Storage solutions, Surgical table/OT table

Healthcare IT / Technology

- Telemedicine, 3D printing
- Wearable technology
- Software, Personal healthcare technology
- Wireless health / mobile health

Medical Tourism Facilitators Dental Equipment and Supplies

and more...
